Subject: Re: New Project Published for Approval Process To Gold King Mine ID

I think what happened, is Janine was in the new Approved project site in the combo project when she published the combo to scribe.net. That new project that came into the combo project, didn't have the ScribeNetprojectid set in the sites table so it went up to Scribe.NET as a new PID 2663 Gold King Mine Approved.

Later, she loaded one of the sample sites as the current site in the combo and she published again successfully as PID 2658.

So we might have found an anomaly in the combo subscribe and publish process...

I think everything is OK now. Next time she publishes, I'll download the mdb she published and make sure the ScribeNEtProjectID in the Sites table is set to 2658 for All Four Sites records.

Also, Ill remove PID 2663 from Scribe.NET

Thanks,

Frank

Hello Joe

Just caught up on the emails. Sounds like all is OK now.

Correct. PID 2662 Gold King Mine Approved is the one in the Combo project so we'll have to make sure that is the one that gets updated and published and we can delete PID 2663

Thanks,

Frank

Check the scribe.net project id.

If you go up to sites and hit edit it should pull up the site details screen.

Scribe.net project id is on bottom.

Does it say 2658 or 2663?

Looks like you've been publishing the gold king approved project. Last publish
7:52 pm

Check your file name at the bottom of the scribe window

Hello Janine, I don't see the Combo project as published since 6pm EST v11. Maybe try to publish it again. Then the new tables will show up in PID 2658

Thanks,

Frank

☺

Ok. Done and Done, Have a look. I could see the fourth project and 221 samples approved.

Nice work everyone, I like being able to just look at those separately in an organized fashion not a color coded spreadsheet.

Eating? Surely that can't be allowed.

Tommorow we will have a query you can add to the combo
project that joins the approved status to the lab results and
sample data.

We will also work on the orphan approved results query for
auditor.

PID 2662 Gold King Mine Approved has been added the
GoldKing_combo subscription.

Next steps would include subscribing for the latest Gold
King Mine Combo project updates which will now
include the new Approved tables. Then publish to
Scribe.NET and the Approved tables will be available to
work with in PID 2658.

Thanks,

Frank
